Dear business partners,

VICTOR

WE ARE DELIGHTED TO PRESENT TO YOU OUR NEW VICTOR WORKBOOK FOR THE 2024/2025 SEASON.

Our new WORKBOOK provides a comprehensive overview of our expanded product range, featuring additional innovations and designs aimed at exceeding your expectations.

We sincerely thank you for your trust and ongoing support. Our partnership is invaluable to us, and we look forward to continued success together in the upcoming season.

We are proud to announce that VICTOR Europe continues to be on a growth trajectory. In 2024, we will not only expand our product range but also increase our workforce to achieve our ambitious goals.

Your support and trust in our brand have significantly contributed to this success. Global challenges have not only strengthened us but also motivated us to explore new avenues.

VICTOR is now a sponsor of the BWF World Tour Finals – this new partnership underscores our ongoing commitment to high-level badminton and enables us to support the best athletes worldwide.

In this context, we continue to invest in talented players who embody the spirit of VICTOR. We are proud to welcome HS Prannoy from India to our team. Currently ranked 7th in men's singles, Prannoy represents not only sporting excellence but also the passion and pursuit of success that define VICTOR.

We firmly believe that our partnerships and investments will not only benefit the athletes but also inspire the badminton community worldwide.

Our commitment to top-notch products and excellent service remains unchanged. In addition to expanding our team, we continue to focus on sustainability and environmentally conscious practices. Our goal is not only to offer high-quality products but also to make a positive contribution to the environment.

The year 2024 will be another milestone for VICTOR Europe on our path of growth and innovation.

We look forward to continuing this exciting journey together with you and express our gratitude for the successful partnership.

Here's to a year filled with opportunities, growth, and shared successes!

Here's to a successful year!

With sportive greetings,

Andreas Sievers

The Badminton World Federation (BWF) is thrilled to announce VICTOR as the Official Equipment Partner of the prestigious season-ending HSBC BWF World Tour Finals from 2023 to 2026.

The partnership adds to VICTOR's current portfolio as equipment supplier of the TotalEnergies BWF Thomas & Uber Cup Finals and TotalEnergies BWF Sudirman Cup Finals until the end of 2025.

The HSBC BWF World Tour Finals is headed to the burgeoning sports hub of Hangzhou for the very first time.

BWF Secretary General Thomas Lund said: „VICTOR has consistently demonstrated innovation in the evolution of badminton equipment, setting new standards for performance and technology within the sport.

„We are delighted to partner with VICTOR as our flagship HSBC BWF World Tour Finals finds its new home in Hangzhou.”

The synergy between BWF and VICTOR promises to elevate the HSBC BWF World Tour Finals, reflecting the shared commitment to the development and promotion of the sport of badminton.

VICTOR's Chairman Jeff Chen stated: „We are honoured to be appointed as the Official Equipment Partner for the HSBC BWF World Tour Finals and to collaborate with BWF in establishing a prestigious annual event for the next four years.

“VICTOR has maintained an unwavering dedication to promoting badminton sports.

We eagerly look forward to witnessing the world-class competition in Hangzhou, joined by fans from across the globe.”

The HSBC BWF World Tour Finals 2023 will be played at the Hangzhou Olympic Sports Centre Gymnasium from 13-17 December.

ALL RACKETS IN ONE CHART

STRINGING PATTERN

WE DROP THE COVERS

In order to avoid plastic waste, we have decided to no longer include a cover with every racket as standard. Instead, we offer you the right case for every need in our assortment. Covers on page 68.

GRIP SIZE (CIRCUMFERENCE)

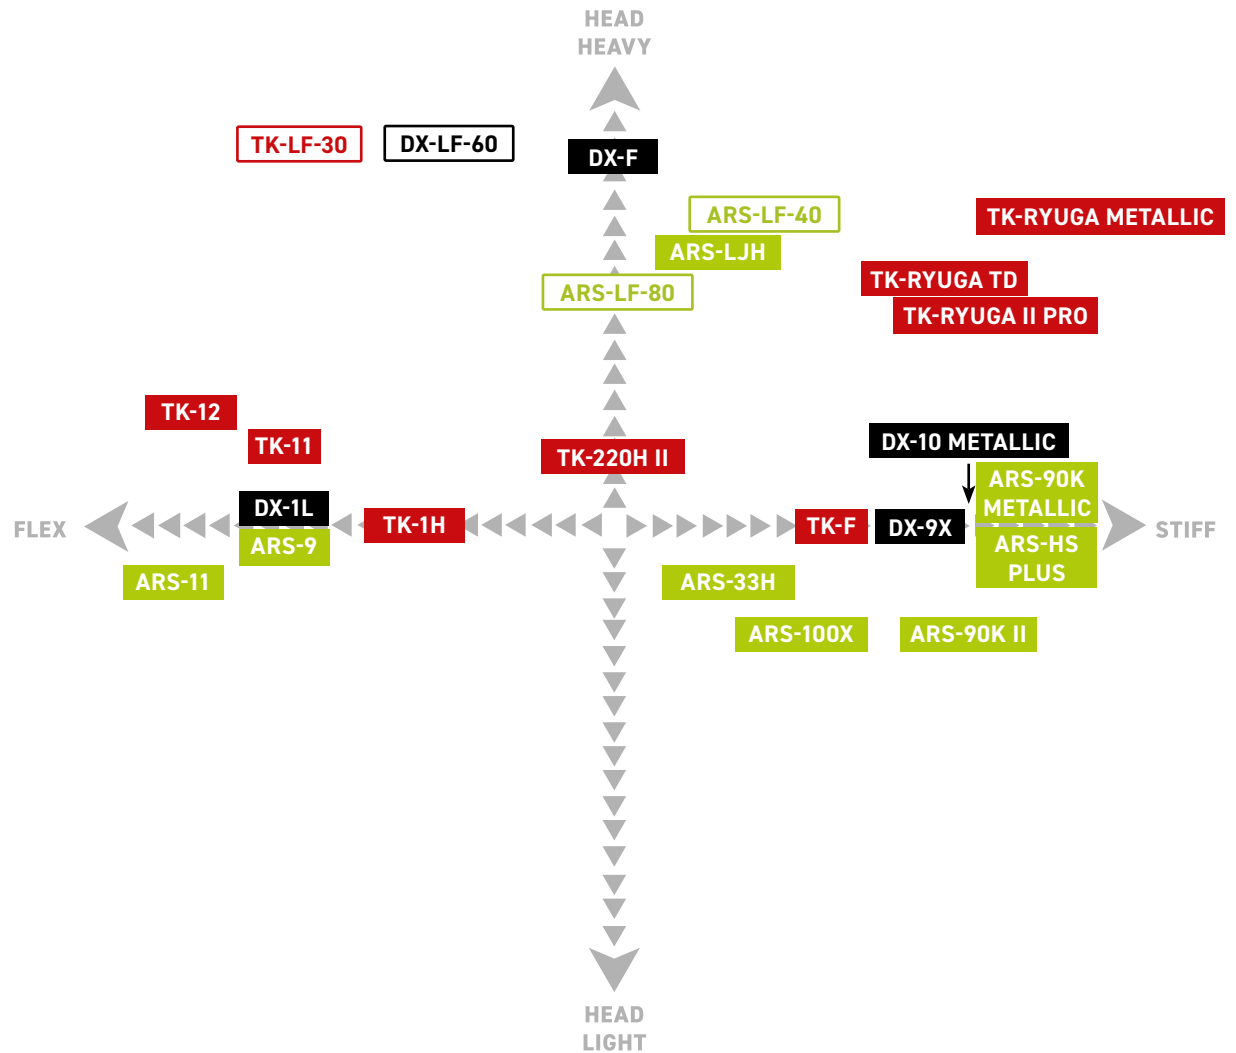

- G 4 = 8,50 cm
- G 5 = 8,10 cm
- G 6 = 7,90 cm

WEIGHT CATEGORY*

- 2 U = 90 - 94,9 g
- 3 U = 85 - 89,9 g
- 4 U = 80 - 84,9 g
- 5 U = 75 - 79,9 g
- 6 U = 70 - 74,9 g
- *without string

All badminton racket details with string and grip.

DriveX 10 Metallic

RACKET TYPES AND SERIES

SPEED IS THE FIRST STEP TO VICTORY

The SPEED type racket is light and can facilitate quick movement, allowing key opportunities to be grasped. This racket type is suitable for players who seek and rely on speed.

ATTACK IS THE BEST FORM OF DEFENCE

The POWER type racket delivers exceptional stability and power. This type of racket is for players who seek maximum power in their game.

PRECISION AND CONTROL

This stable and solid ALL-AROUND racket type gives excellent handling and is suitable for players seeking precision and control.

RACKET · OF · CHOICE

WES 3.0

WHIPPING ENHANCEMENT SYSTEM

The graduated strength design in the shaft in the 3rd iteration of the WES helps boost power and creates sharper hitting angles over the net.

*Test results by VICTOR players show their average maximal overhead smashing velocity increases by 4.2% (between WES 2.0 & WES 3.0 rackets).

THRUSTER

RYUGA METALLIC

Continuing the characteristics and wooden handle elements of the TK-RYUGA, it provides a crisp hitting feedback. By incorporating metallic carbon fiber into the racket frame, it unleashes a more fierce and precise attacking power.

THRUSTER

Attack is the best form of defence and a fundamental base for victory. Experience a frame structure with stronger material, double reinforced for increased smash power and higher stringing tensions. The THRUSTER is well known for its powerful attacks, supplying your game with more speed and strength. Brace yourself for intense smashes and fast success.

Colour	Red
Head shape	Heart
Weight	Abt. 190 g
Balance	Abt. 330 mm
Max. stringing tension	10 kg I 14x19 pattern
String	Multifilament string
Extra	Engineered in Germany
Material	Aluminium

The VICTOR squash ball enjoys a consistently high quality around the world. This is confirmed by the official WSF Certificate (World Squash Federation). Since 2014 our VICTOR squash ball double yellow has been used as a game ball in Austria and in Germany from Juli 2014 to June 2020. In 2017 the portfolio was complemented with a green squash ball for useage in regional higher altitudes and a white ball for glass courts. The other speeds (blue, red and yellow) are available in equal measure.

Suitable bumper for all IP-rackets to protect your racket.

Technologies

WORKBOOK
2024/25

RACKET TECHNOLOGIES AND MATERIALS

Integrates R.T.C with high resilient modulus graphite material to enable swift and all-around rebound performance, redefining what a speed racket could be.

The box-shaped design effectively increases the stability and anti-torque, and can stand higher string tensions.

AERO-HEX

Using aerodynamics technology to transform traditional hexagonal frame with better airflow-directing and air-cutting performance, further achieving incredible stability and the smoothness of swings.

ULTRA-THIN FRAME

The Ultra Thin Frame is up to 7% thinner than traditional rackets to improve the swinging speed while maintaining the stiffness and anti-torsion.

NEW ULTRALIGHT FRAME

The light weight frame structure designed exclusively for 6U rackets enhances the strength and reduces the weight of the frame simultaneously.

Three different frame structures are rearranged and integrated to optimize the hitting, frame characteristics and overall performance.

The smaller angle of twist in the shaft material is the key to an optimal power transmission and anti-torsion performance.

The elliptically-shaped section can decrease air resistance, provide higher anti-torque, maximize control and vastly increase the speed of a returning hit.

The recovery performance enhanced by high modulus material unleashes the shaft's elasticity potential and creates fast rebound.

This diamond-shaped design cuts through the air like a sword. It significantly reduces air resistance and provides a faster swing speed.

DYNAMIC-SWORD

DYNAMIC-SWORD features an inward-cutting frame structure in the 6/12 o'clock direction, and an outward-cutting frame structure in the 3/9 o'clock direction, which is designed to imitate the aerodynamics of a sword blade cutting through the air, making each swing swift and sharp.

R.T.C. technology, based on scientifically-designed structure and data analysis, introduces "reflection point" to the frame's key spots to maximise the "rebound" performance, effectively improving both the quality and speed of each swing.

The Whipping Enhancement System incorporates a softer material in a specific part of the shaft near the throat, enhancing racket-head acceleration in a "whipping" style which helps to create steeper and quicker attacks with satisfying control.

The innovative carbon fiber layering design has improved the antitorsion performance, further making the racket flex faster with better force transmission. As a redefinition of „whipping effect“, WES 2.0 allows the players to drive the shuttle at a sharp downward angle when attacking.

Brand new shaft layering design with more directly force transmission, a steeper downward angle, and advanced whipping effect.

RACKET TECHNOLOGIES AND MATERIALS

Inspired by Helicopter rotor blade technology – the multilayered structure made of carbon fibre and composites, minimises material size and reinforces handling feel and performance.

The technology seamlessly integrates the shaft with FREE CORE, elevating the elasticity to another level and bringing out the full potential of the racket.

The integrated force of the shaft and FREECORE creates a sturdy handling and phenomenal elasticity.

CATAPULT STRUCTURE stores power and releases at smashing for maximum effect .

Based on multilayered carbon fibre, the advanced Fibre Reinforced System (FRS) not only improves elasticity, but also offers stable controllability with high tension string.

The NANO TEC technology works by evenly distributing nano-sized particles in the vacant space between carbon fibre bundles; this increases the overall stiffness of the carbon composite fibres and reduces the distortion of the frame.

The compound frame design can be divided into three major parts: The upper section is made with a fan-shaped structure to lower wind resistance and accelerate each swing. The Compound-Sword structure in the middle section is designed to lighten the filler and enable fast rebound. Finally, the lower section is built in aerofoil structure to lower wind resistance and keep excellent anti-torsion performance in a "whipping" style which helps to create steeper and quicker attacks with satisfying control.

The introduction of METALLIC CARBON FIBER (metal + carbon fiber) into the rackets. This ensures a unique and elastic feeling, guaranteeing an unparalleled hitting experience.

METALLIC CARBON SHAFT (metal + carbon fiber) helps to boost the speed of shots and the power of smashes, allowing for sharp and accurate maneuverability.

Designed by computer simulation and aided with the adoption of injection moulding technique, this revolutionized handle style allows the shaft to move more freely, which can not only make swings smoother but also improve overall handling experience.

Built on the strengths of the NANO FORTIFY TR, the NANO FORTIFY TR+ is engineered with an advanced, more durable carbon-fiber that is firm but offers pleasing resilience and feeling.

A breakthrough from traditional hexagonal frame—different types of frame structures are integrated into the upper, middle, and lower parts of the frame based on the racket setting to optimize stability and swing smoothness.

PYROFIL

PYROFIL carbon fibre is advanced high-performance and ultra light material from Japan. It offers excellent shock absorption and enhances handling in every single game.

Introducing highLy resilient and durable glass fiber into the multilayered design of the frame to provide better elasticity and comfort while hitting.

TECHNOLOGIES SHOES

NitroLite

The groundbreaking lightweight midsole is made with high performance EVA by means of an innovative nitrogen-impregnating foaming process, providing excellent durability and rebound performance.

HYPEREVA

VICTOR HYPEREVA is the latest developed midsole technology that focuses on resilience and cushioning. It's well known for incredible softness, shock-absorption, rebound performance, and how it makes the shoes both durable and lightweight. Badminton shoes built with HYPEREVA can achieve better lightweightness, elasticity, and stability than before.

DIGITWIRE

DIGITWIRE uses digital programming to create three-dimensional uppers by layering extra strong threads of difference thickness with intricate embroidery craftsmanship. DIGITWIRE upper offers breathability, strength, durability and a snug fit.

ENERGYMAX

The shock absorbing ENERGYMAX system is well known for providing comfortable support during fast movements and directional changes.

ENERGYMAX3.0

The new generation of highly elastic material, increases rebound ability and strengthens shock absorption.

V/-Tough

The inner surface of the toe is made of super wear-resistant material which greatly improves the durability and resilience of the shoe.

ENERGYMAX V

Improves the shock absorption on the heels when striding forward. Strengthens the rebound ability of the heels during speedy defense. The shock absorbability is increased by 27%, and the bounce power is raised by 30%.

EVA Feather Resilient

EVA Feather Resilient not only preserves excellent elasticity, but also improves the lightweightness by 20% compared to traditional midsole, helping relieve leg muscle strain and making swift movement easier and faster.

Breathing

A unique breathing mesh layer on the side of the shoe is used to increase ventilation creating a more comfortable environment for the feet.

Resilient EVA

Highly resilient midsole material is more durable and retains its shape better. It not only provides basic stability and shock absorption, but also increases flexibility and the reaction time while changing direction.

Light Resilient EVA

New, highly resilient and durable midsole. It improves the life-span of shoes, reduces weight, increases flexibility and lowers muscle burden during intensive exercises, which allows one to make agile movements quickly.

LS-S

The outside of the forefoot is designed using high-strength TPU. This significantly enhances the lateral stability during intense and rapid transfer of direction.

NEO DUPLEX

Joint-friendly combination of ENERGYMAX 3.0 on top and light resilient EVA sole beneath by the special biomechanical layout of these cushioning layers.

JACQUARD EM

The three-layered structure enables the Jacquard EM to deliver flexible durability, perfect fit, and incredible breathability. The upper layer is soft and low stretchable MONO mesh; the bottom layer is soft, light, and breathable mesh. The upper and bottom layers are joined perfectly by the PUR gluing technique on the middle layer to achieve great softness and breathability.

VSR ANTI-SLIP

With this upgraded outsole rubber, slip-resistant performance increases on dry PU floor.

TECHNOLOGIES SHOES

V-Durable

The inner toe use the special technics to provide better strength and durability.

V-Durable+

Additional to the reliable V-Durable, the inner surface of the toe is equipped with protective coatings and a wear-resistant layer for enhanced endurance.

SHAPE ICONS

Designed to Reduce excess space of front shoe for Greek-type-toes.

Creates more comfort and firm responses to the Egyptian-type-toes.

Designed for a better fit based on the female foot shape.

Made with polyurethane granular material, E-TPU has excellent resilience and deformation recovery ability once foam molded, making it not easy to deform for long time wearing. E-TPU provides a comfortable, shock-absorbing, and elastic wearing experience, which is significantly better than traditional EVA Material.

All VICTOR shoes are equipped with a NON MARKING SOLE. So you can be sure not to leave any unsightly marks on the floors.

The Tri-Arch support control is an arch design of the footbed based on the three arches of the foot: medial and lateral longitudinal arches and transverse arch. Tri-Arch is ergonomically designed to keep the original curvature of the three arches, which offers a more comfortable support to the sole, evenly distributes the pressure, and enables better controllability.

A high-strength light weight thermoplastics TPU arch support is placed in the arch. This prevents pronation and torsional strain while providing stability.

Drop-in Midsole combined insole with midsole, not only increase its durability, but also provide more comfortable and nice support to the longitudinal and transverse arches.

Drop-in Midsole 2.0 features a dual-layer design: the upper layer is the insole with a top fiber mesh, while the lower layer is a midsole with ventilating grooves. This unique combination provides exceptional moisture absorption and air circulation, enhancing breathability and overall comfort.

The three-dimensional carbon fiber sheet provides midsole stability and decreases torsional strain on the foot's arch.

BAG AND TEXTILE ICONS

 Racket compartment	 Shoe compartment	 PerfectDry / sweat absorbing	 Breathable
 Compartment for dirty clothing	 Trolley function	 Min. 2 years availability	ULTRA-DRY™ Evolutionary speedy drying
 Compartment for clean clothing	 Functional front pouch	 Kids Sizes (140, 152, 164)	 Recycled fabric
 Space for shuttles	 Swivel Strap System	 Inherently stable	
 Shoulder strap	 Airflow-mesh		

CERTIFICATIONS

Environment protection & working conditions - partner and certifications of VICTOR

For decades, VICTOR stands for sporting expertise and innovative, high-quality products. Environmental compatibility and sustainability are in the focus as well as questions about skin compatibility, life cycle assessment and recyclability of materials and end products.

VICTOR therefore works together with the Hansecontrol company on sensitive, relevant product groups. Suppliers are put through their paces and must either comply with the BSCI standard or be supervised by SGS, TÜV Rheinland or other testing institutes that vary regionally.

Product testing for purity, contaminants and safety

Environment and labour protection

Oeko-Tex® Standard 100 is a worldwide equal test and certification system for textile.

Klimainvest Green Concept
KLIMAZERTIFIKAT
Zertifikat Nr. 2023-8536-0001

Hiermit bestätigen wir, dass VICTOR Europe GmbH, Markt-Center-Blau 4, 25358 Harse, in Kooperation mit TÜV SÜD, den klimaneutralen Ausgleich von mindestens 26,3 Tonnen CO₂-Emissionen, die für den Zeitraum vom 01. Januar 2023 bis zum 31. Dezember 2023 angerechnet werden.

Der Klimabeitrag wird über das Projektportfolio der Klimainvest Green Concept GmbH umgesetzt. Die unterstützten Projekte sind offiziell registriert, folgen dem Regulatorien des Kyoto-Protokolls und sind zusätzlich nach den strengen Anforderungen der unabhängigen und gemeinnützigen Verifier Carbon Standard Association (VCS) zertifiziert.

Damit erfüllt ein klimaneutraler CO₂-Ausgleich im berechneten Umfang im Bereich Transportwesen durch zertifizierte Klimaschutzprojekte.

Die Ausstellung und Entwertung der CO₂-Minderungsrechte wird über geeignete internationale Register durchgeführt und effizient bestätigt.

2023 Jochen Jäger, Klimainvest Green Concept GmbH

Klimainvest – is a TÜV-certified company that supplies energy suppliers with green electricity and climate-neutral green gas and supports companies on their way to climate neutrality.

VICTOR saved in 2023 26,3 TEU of Co2 emissions.

WE SAVE PLASTIC IN EVERYDAY LIFE:

Plastic bottles are no longer used in our office. But we prefer to put them into our shirts!

WE DROP THE COVERS

In order to avoid plastic waste, we have decided to no longer include a cover with every racket as standard. Instead, we offer you the right case for every need in our assortment.

100% RECYCLED

Since 2020, we have been investing in the conversion of Teamline from conventional material to recycled material.

CONVERSION TO HYBRID/ELECTRIC FLEET

Almost all company cars have already been replaced with hybrid or electric cars.

NO FOILS IN PRINT

For print products, we use certified paper and do not refine them with films. We also try to keep the print runs low.

SAVING ENERGY

Our new European Head Office building complies with the KfW standard. This means we use as little energy as possible in the office.

PAPER FREE OFFICE

We are on a very good track.
